

ROLLCART-V™

MOBILE SPRINKLER CART WITH ZE 30 W

SPECIFICATIONS:

Irrigation width	35 - 40 m (pressure dep.)
Irrigation length	120 m
Flow	3,00 - 4,3 m ³ /h (pressure dep.)
Working speed	10 to 20 m / h
Pressure	Min. 4 bar on the device
Material	GF reinforced plastic
Dimension	77 x 47 x 40 cm
Weight	27,0 kg

AREAS OF APPLICATION:

Large sized green areas, sports fields, nurseries and gardens.

FEATURES:

- Extremely flexible use without fixed installation
- Drives and rains independently: after opening the water supply, the RollcarT-V pulls itself along the previously laid nylon rope covering the area to be irrigated.
- At the end of the area, the RollcarT-V automatically stops the water and ends the irrigation.
- The water-carrying hose with a diameter of 1" and a length of min. 60 m is pulled along behind. (not included)
- The sprinkler allows the selection of a irrigated sector area.
- Irrigation can be excluded either side of the cart.
- The encapsulated gearbox has particularly low friction and is practically maintenance-free.
- The compact, enclosed design makes using the RollcarT-V a walk in the park.
- The adjustable speed control allows the irrigation density to be set to the exact actual demand.
- The precision of the ZE sprinkler and the synchronised operation of the RollcarT-V guarantee optimum water distribution.
- With the appropriate setting the RollcarT-V will drive on the dry areas of the lawn only avoiding damage to the wet turf.
